

Beyma's Latest Products

Among Beyma's latest products is the MC500 family: 10 inches, 12 inches and 15 inches. The family offers unique woofers designed in 2.5-inch voice coil with ceramic magnet. A new technology applied to the products is the X-Bow technology, which is an improvement for increasing the total SPL of Beyma's pleated diaphragm tweeters, allowing the new model TPL-200 to feature an increased sensitivity and more power handling capacity. Upgraded versions of Beyma's recognized models 18P1000Fe and 15P1000Fe are the new 15 and 18P1000FeV2. Another new 18-inch subwoofer is the 18PWB1000Fe, which is designed to deliver a lower end and a deeper sound in the 18-inch range. Beyma, 34 961 301 375, beyma.com.
